Hiring Committee
Equitable

Dear Hiring Committee,

I am excited to apply for the 2026 Financial Risk Summer Internship at Equitable. I am a Finance major at Rutgers Business School graduating in May 2027, and I am very interested in understanding how financial institutions manage investment, capital markets, and product-related risks. What drew me to this role is the opportunity to work with a team that collaborates across actuarial, hedging, and investment functions while tackling real business and capital challenges. I'm a curious student who enjoys quantitative work, and I'm eager to learn directly from professionals in a fast-paced risk environment.

Through my coursework, I have built a strong foundation in finance, probability, and financial management. I have experience analyzing financial statements, building a full financial model, and applying concepts like discounting, forecasting, and sensitivity analysis. These projects taught me the importance of accuracy, attention to detail, and asking the right questions when working through complex problems. I've also gained experience managing multiple responsibilities through leadership roles, group projects, and jobs outside the classroom, which helped me stay organized and adaptable.

What interests me most about Equitable's program is the chance to apply analytical thinking to real risk-related issues while learning how large financial institutions make decisions around markets, capital, and product structures. I'm especially excited about the collaborative aspect of the role—working across actuarial, hedging, and investment teams is an opportunity to gain a well-rounded understanding of financial risk. I'm motivated, detail-oriented, and eager to grow, and I would value the chance to contribute while learning from experienced team members.

Thank you for considering my application. I would appreciate the opportunity to bring my strong work ethic, analytical mindset, and willingness to learn to Equitable this summer.

Sincerely,

Geremy Lora-Diaz
